

23th March 2026

Dear Valued Customer,

Dear Business Partner,

Due to the continued volatility in fuel prices, we are continuing the **weekly adjustment** of our fuel surcharge mechanism, as previously communicated. This enables us to reflect market developments more accurately and transparently.

Closing value	Brent USD	Evolution	Part	Fuel index
01-03-26	73,0000			
Average week 10	86,5780	18,60%	20%	3,72%
Average week 11	102,8040	40,83%	20%	8,17%
16-03-26	106,5			
17-03-26	104,98			
18-03-26	111,9			
19-03-26	119,13			
20-03-26	113,11			
21-03-26				
22-03-26				
Average week 12	111,1240	52,22%	20%	10,44%

Last week, fuel prices increased by **52,22%**. As fuel represents approximately **20%** of our **operational transport costs**, the resulting impact on our pricing is calculated as follows:

$$52,22\% \times 20\% = 10,44\%$$

Therefore, an additional **10,44% fuel surcharge** will be applied to transports executed during **Week 13**.

This weekly adjustment ensures that any future decreases in fuel prices will also be reflected **more quickly**, allowing the surcharge to adapt faster to market conditions.

We will continue to provide **weekly updates** and remain available should you have any questions.

Kind regards,
