

March 6, 2026

Dear Valued Customer,  
 Dear Business Partner,

We would like to inform you about the current developments in the energy and fuel markets and their impact on our road transport operations.

Over the past days, geopolitical tensions and military developments in the Middle East involving Iran have created significant uncertainty in global energy markets. As a result, oil and gas prices have increased sharply, mainly due to concerns about potential disruptions to key supply routes in the region, particularly the Strait of Hormuz.

These tensions are already reflected in the European fuel markets. Diesel prices have risen significantly in recent days, reaching their highest levels in several months across multiple European countries. As illustrated in the overview below, fuel quotations have increased by more than 15% since 02/03/2026.

As a road transport company operating throughout Europe, fuel represents one of the most significant components of our operational costs. The current market volatility therefore has a substantial impact on transport costs that we are unfortunately unable to absorb entirely ourselves.

Our standard fuel surcharge mechanism is designed to be adjusted on a monthly basis and does not allow us to respond immediately to sudden and sharp increases in fuel prices.

In light of the current situation, we will temporarily adapt the calculation of the fuel surcharge to a weekly adjustment until the market shows signs of stabilization. We will therefore inform you in the coming days of the weekly fuel surcharge rate applicable as from 01/03/2026.

Together with our partners and suppliers, we are doing everything possible to mitigate the impact of these developments while maintaining the reliability and quality of our services. However, given the rapid market evolution over the past days, this adjustment has unfortunately become unavoidable.

We sincerely appreciate your understanding in this uncertain environment and remain fully committed to supporting your logistics operations.

Should you have any questions, please do not hesitate to contact your usual contact person within our team.

Kind regards,
