

06th April 2026

Dear Valued Customer,

Dear Business Partner,

Due to the continued volatility in fuel prices, we are continuing the **weekly adjustment** of our fuel surcharge mechanism, as previously communicated. This enables us to reflect market developments more accurately and transparently.

Closing value	Brent USD	Evolution	Part	Fuel index
01-03-26	73,0000			
Average week 10	86,5780	18,60%	20%	3,72%
Average week 11	102,8040	40,83%	20%	8,17%
Average week 12	111,1240	52,22%	20%	10,44%
Average week 13	109,3460	49,79%	20%	9,96%
30-03-26	116,89			
31-03-26	119,24			
01-04-26	105,94			
02-04-26	109,74			
03-04-26				
04-04-26				
05-04-26				
Average week 14	112,9525	54,73%	20%	10,95%

Last week, fuel prices increased by **+54,73%**. As fuel represents approximately **20%** of our **operational transport costs**, the resulting impact on our pricing is calculated as follows:

$$54,73\% \times 20\% = +10,95\%$$

Therefore, an additional **+10,95% fuel surcharge** will be applied to transports executed during **Week 15**.

This weekly adjustment ensures that any future decreases in fuel prices will also be reflected **more quickly**, allowing the surcharge to adapt faster to market conditions.

We will continue to provide **weekly updates** and remain available should you have any questions.

Kind regards,
