

13th April 2026

Dear Valued Customer,

Dear Business Partner,

Due to the continued volatility in fuel prices, we are continuing the **weekly adjustment** of our fuel surcharge mechanism, as previously communicated. This enables us to reflect market developments more accurately and transparently.

| Closing value | Brent USD | Evolution | Part | Fuel index |
|------------------------|-----------------|-----------|------|-----------------|
| 3/1/2026 | 73.0000 | | | |
| Average week 10 | 86.5780 | 18.60% | 20% | + 3.72% |
| Average week 11 | 102.8040 | 40.83% | 20% | + 8.17% |
| Average week 12 | 111.1240 | 52.22% | 20% | + 10.44% |
| Average week 13 | 109.3460 | 49.79% | 20% | + 9.96% |
| Average week 14 | 112.9525 | 54.73% | 20% | + 10.95% |
| 4/6/2026 | | | | |
| 4/7/2026 | 111.8 | | | |
| 4/8/2026 | 97.22 | | | |
| 4/9/2026 | 99.5 | | | |
| 4/10/2026 | 98.26 | | | |
| 4/11/2026 | | | | |
| 4/12/2026 | | | | |
| Average week 15 | 101.6950 | 39.31% | 20% | + 7.86% |

Last week, fuel prices increased by **+39,31%**. As fuel represents approximately **20%** of our **operational transport costs**, the resulting impact on our pricing is calculated as follows:

$$39,31\% \times 20\% = +7,86\%$$

Therefore, an additional **+7,86% fuel surcharge** will be applied to transports executed during Week 16.

This weekly adjustment ensures that any future decreases in fuel prices will also be reflected **more quickly**, allowing the surcharge to adapt faster to market conditions.

We will continue to provide **weekly updates** and remain available should you have any questions.

Kind regards,
