

Dear Valued Customer,

Dear Business Partner,

Due to the continued volatility in fuel prices, we are continuing the **weekly adjustment** of our exceptional fuel surcharge mechanism, as previously communicated. This enables us to reflect market developments more accurately and transparently.

Average week 22	99,7680	36,67%	20%	7,33%

Last week, fuel prices increased by **+36,67%**. As fuel represents approximately 20% of our operational transport costs, the resulting impact on our pricing is calculated as follows:

$$36,67\% \times 20\% = +7,33\%$$

Therefore, an additional **+7,33% fuel surcharge** will be applied to transports executed during Week 23.

This weekly adjustment ensures that any future decreases in fuel prices will also be reflected **more quickly**, allowing the surcharge to adapt faster to market conditions.

We will continue to provide **weekly updates** and remain available should you have any questions.

Kind regards,

DANDOY team
