

07-09-2026

Dear Valued Customer,

Dear Business Partner,

Due to the continued volatility in diesel prices, we are continuing the **weekly adjustment** of our exceptional fuel surcharge mechanism, as previously communicated. This enables us to reflect market developments more accurately and transparently.

During Week 35, the average diesel price amounted to **€34.51**. Fuel represents approximately **20%** of our operational transport costs.

These figures form the basis of the fuel surcharge applicable to transports executed during **Week 36**.

This weekly adjustment ensures that any future decreases in fuel prices will also be reflected **more quickly**, allowing the surcharge to adapt faster to market conditions.

We will continue to provide **weekly updates** and remain available should you have any questions.

Kind regards,

DANDOY team
