

14-09-2026

Dear Valued Customer,

Dear Business Partner,

Due to the continued volatility in diesel prices, we are continuing the **weekly adjustment** of our exceptional fuel surcharge mechanism, as previously communicated. This enables us to reflect market developments more accurately and transparently.

Based on the latest diesel price evolution, and as fuel represents approximately **20%** of our operational transport costs, the exceptional fuel surcharge for this week amounts to **+8.04%**.

Therefore, an additional **+8.04%** fuel surcharge will be applied to transports executed during **Week 38**.

This weekly adjustment ensures that any future decreases in fuel prices will also be reflected **more quickly**, allowing the surcharge to adapt faster to market conditions.

We will continue to provide **weekly updates** and remain available should you have any questions.

Kind regards,

DANDROY team
